**Additional declaration**

For specified plants, other than plants which have been grown for the entire production cycle in vitro, originate in an area where *Xylella fastidiosa* is known to be present:

**Consignment complies with Article 30.1 c of of Commission Implementing Regulation (EU) 2020/1201  
and**

**The host plants have been produced for their entire production cycle in one or more pest-free sites** authorised by the national plant protection organisation in accordance with Article 31 and that the host plants have been transported in closed containers or packaging, ensuring that infection with the specified pest through its vectors cannot occur;

The name or code of the pest free production site(s) shall be indicated on the Certificate

For specified plants, which have been grown for the entire production cycle in vitro, originate in an area where *Xylella fastidiosa* is known to be present:

Under the rubric 'Additional Declaration'

**Consignment complies with article 30.2 d of Commission Implementing Regulation (EU) 2020/1201  
and**

**The host plants have been produced in vitro for their entire production cycle in one or more pest-free sites** authorised by the national plant protection organisation in accordance with Article 31 and that the host plants have been transported in closed containers or packaging, ensuring that infection with the specified pest or any of its known vectors cannot occur;

The name or code of the pest free production site shall be indicated on the Certificate

Beware, it is possible you need more additional declarations. See ADDITIONAL DECLARATION PER SECTOR

## ATTACHMENT 2: Anoplophora

### ***Additional declaration for Anoplophora chinensis***

*Acer spp., Aesculus hippocastanum, Alnus spp., Betula spp., Carpinus spp., Citrus spp., Cornus spp., Corylus spp., Cotoneaster spp., Crataegus spp., Fagus spp., Lagerstroemia spp., Malus spp., Melia spp., Ostrya spp., Photinia spp., Platanus spp., Populus spp., Prunus laurocerasus, Pyrus spp., Rosa spp., Salix spp., Ulmus spp. and Vaccinium corymbosum*

Plants for planting having a stem or root collar diameter of 1 cm or more at their thickest point, other than seeds

Origin	Required additional declaration full reference text	Required additional declaration (as it should appear on the certificate)
Third countries where <i>Anoplophora chinensis</i> is <b>known not to be present</b>	<b>Consignment complies with Article 11 of Commission Implementing Regulation (EU) 2022/2095</b>  <a href="#">See list of free countries</a>	The plants originate from a country where <i>Anoplophora chinensis</i> is known not to be present
Third countries where <i>Anoplophora chinensis</i> is <b>known to be present</b>	<b>Consignment complies with Article 12 of Commission Implementing Regulation (EU) 2022/2095</b>  1. Specified plants originating in third countries where the specified pest is known to be present shall be accompanied by a phytosanitary certificate indicating the 'Additional Declarations'  The name of the pest-free area shall be mentioned on the certificate under the rubric "Place of Origin"  The surveys referred to in the first subparagraph, point (a), have been based on the Authority's General guidelines for statistically sound and risk-based surveys of plant pests, while the survey design and sampling scheme used has been able to identify with a sufficient level of confidence, a low level of presence of infested plants.	<b>(a) The plants have been grown throughout their life in a place of production which is registered and supervised by the national plant protection organisation in the country of origin and situated in a pest-free area established by that organisation in accordance with relevant International Standards for Phytosanitary Measures and on the basis of official surveys</b>  <b>or</b>  <b>(b) The plants have been grown during a period of at least two years prior to export, or in the case of plants which are younger than two years, have been grown throughout their life in a place of production:</b>  <div style="display: flex; justify-content: space-between;"> <div style="width: 10%;">(i)</div> <div><b>Established as free from <i>Anoplophora chinensis</i></b> in accordance with International Standards for Phytosanitary Measures</div> </div> <div style="display: flex; justify-content: space-between;"> <div style="width: 10%;">(ii)</div> <div><b>Registered and supervised by the national plant protection organisation in the country of origin</b></div> </div>

<p>--next--↓ --continuation--</p>	<p>The surveys referred to in the first subparagraph, point (b)(iv), second indent, have been based on the Authority's General guidelines for statistically sound and risk-based surveys of plant pests, the survey design and sampling scheme used have been able to identify with at least 95 % confidence level of presence of infested plants of 1 %. In case signs of the specified pest have been found, eradication measures have been immediately taken to restore the pest freedom in the buffer zone.</p> <p>The size of the sample for the inspection referred to in the first subparagraph, point (b)(v), shall be such as to enable at least the detection of 1 % level of infestation with a level of confidence of 99 %.</p> <p>2. Specified plants introduced into the Union territory in accordance with paragraph 1, shall be inspected at the point of entry or at the approved control points.</p> <p>The inspection methods applied shall aim at the detection of any sign of the specified pest, in particular in roots and stems, and include targeted destructive sampling. The size of the sample for inspection shall be such as to enable at least the detection of 1 % level of infestation with a level of confidence of 99 %, taking account of ISPM No 31(10).</p> <p>3. The targeted destructive sampling referred to in this Article shall be carried out at the level set out in the table:</p>	<p>(iii) <b>Subjected annually to at least two official inspections for any sign of <i>Anoplophora chinensis</i> carried out at appropriate times and no signs of the pest have been found</b></p> <p>(iv) <b>Where the plants have been grown in a site:</b></p> <p><b>- with physical protection against the introduction of <i>Anoplophora chinensis</i></b></p> <p><b>or</b></p> <p><b>- with the application of appropriate preventive treatments and surrounded by a buffer zone with a width of at least 1 km where official surveys for the presence or signs of <i>Anoplophora chinensis</i> are carried out annually at appropriate times</b></p> <p>(v) <b>Where immediately prior to export consignments of the plants have been subjected to an official inspection for the presence of <i>Anoplophora chinensis</i>, in particular roots and stems, including targeted destructive sampling</b></p> <p><b>or</b></p> <p><b>(c) The plants have been grown from rootstocks which meet the requirements of point (b), grafted with scions which meet the following requirements:</b></p> <p>(i) <b>At the time of export, the grafted scions have been no larger than 1 cm in diameter at their thickest point; and</b></p> <p>(ii) <b>the grafted plants have been inspected in accordance with point (b)(iii)</b></p>
---------------------------------------	---	---

	Levels of destructive sampling		
	Nr of plants in the lot	Nr of plants to be cut	
	1 - 4.500	10% of lot size	
	> 4.500	450	

### **Additional declaration for *Anoplophora glabripennis***

*Acer spp.*, *Aesculus spp.*, *Alnus spp.*, *Betula spp.*, *Carpinus spp.*, *Cercidiphyllum spp.*, *Corylus spp.*, *Fagus spp.*, *Fraxinus spp.*, *Koelreuteria spp.*, *Platanus spp.*, *Populus spp.*, *Salix spp.*, *Tilia spp.* and *Ulmus spp.*

Plants for planting having a stem or root collar diameter of 1 cm or more at their thickest point, other than seeds
