ADDITIONAL DECLARATIONS WOOD

Additional declarations on phytosanitary certificates for exports to the European Union as required in Article 71.2 of the Plant Health Regulation (EU) 2016/2031. The list of plants, plant products and other objects, originating from third countries, and the corresponding special requirements for their introduction into the Union territory is set out in Annex VII of Commission Implementing Regulation (EU) 2019/2072.

The phytosanitary requirements for import of plant products into The Netherlands are based on Commission Implementing Regulation (EU) 2019/2072. **In case of alternative options for meeting import requirements** as mentioned in annex VII of (EU) 2019/2072 (Article 71.2 of the Plant Health Regulation (EU) 2016/2031), details of the option used must appear in the Additional Declaration box of the Phytosanitary Certificate accompanying the consignment. Reference must be made to annex VII of Commission Implementing Decision (EU) 2019/2072 (including the relevant position), as well as the required minimal additional declaration text as it should appear on the certificate (see bold text in the additional declaration document). The same approach has to be followed for Additional Declarations mentioned in other Commission Implementing Decisions.

NOTE: In Annex V and VII of (EU) 2019/2072 phytosanitary requirements without alternative options are also described. These requirements have to be fulfilled although do not have to be mentioned in the Additional declaration box needed of the Phytosanitary Certificate.

Overview of latest changes/additions

Version	Date	Content changed or added
2.5	6-3-2024	Added (specified organism) to the additional declaration in point 10.2 and 10.4
2.4	20-9-2023	Added (EU) 2023/1312 oak logs with bark origin USA and point 87.1, 87.2 Agrilus planipennis origin USA/CAN
2.3	22-02-2023	Changed the layout of Additional Declaration point 80, 81

How to use these pages and annexes

1. Open the table for the specific form of the wood product, check [WOOD PRODUCT FORMS](#)
2. Check whether the species is listed; if not, choose another table
3. Choose the origin, be as specific as possible

Definitions for 'Origin':

Origin	Means
Third countries	Any country outside the European Union
Non-European countries	Any country outside Europe
... countries, other than A	The requirement is not valid for country A. The requirement for country A is listed elsewhere
Countries recognized as being free from X	The countries that are mentioned are officially recognized by the EU ¹ as being free from X
Areas recognized as being free from X	The areas that are mentioned are officially recognized by the EU ¹ as being free from X
... countries where X is known to occur ...	This requirement depends on the pest status for organism X in the country of origin (to be determined by the country of origin). If pest X is absent, this declaration need not be present on the certificate at all. The requirement is shaded in yellow

¹ The EU officially recognizes a number of countries, or areas within a country, as free from a specific organism. These countries and areas are listed in the table. In those cases the additional declaration indicating the 'country free from ...' can only be used if the country is listed. The same goes for areas: The additional declaration indicating the 'area free from ...' can only be used if the area is listed **and** mentioned on the certificate. It is not obligated to choose the number that is communicated to the Commission.

4. BOTH the full reference text (including the number)(see the column Required additional declaration full text reference, as it should appear on the **certificate**) and the text (see column **Required minimal additional declaration text (see in bold) as it should appear on the certificate**) shall be mentioned on the certificate. An example:
in case 102a is chosen, the text should be: Consignment complies with Annex VII, point 102 a of Commission Implementing Regulation (EU) 2019/2072, the wood originates in a country recognised as being free from Euwallacea fornicatus originate in a country free from Liriomyza sativae
5. In the column 'Required additional declaration full reference text, as it should appear on the certificate' the different possible declarations are shown, divided by 'or'; One of these declarations should be mentioned on the certificate (e.g. 102 a **or** 102 b **or** 102 c **or** 102 d)
6. In some cases more than one additional declaration applies (e.g. 102 a **or** 102 b; as well as 109 a **or** 109 b).

For example: *Acer saccharum*

The certificate should read:

Consignment complies with Annex VII, point **85** of Commission Implementing Regulation (EU) 2019/2072

Besides this, the certificate should **also** read:

Consignment complies with Annex VII, point **109 a** of Commission Implementing Regulation (EU) 2019/2072

or it should read:

Consignment complies with Annex VII, point **109 b** of Commission Implementing Regulation (EU) 2019/2072

or it should read:

Consignment complies with Annex VII, point **109 c** of Commission Implementing Regulation (EU) 2019/2072

or it should read:

Consignment complies with Annex VII, point **109 d** of Commission Implementing Regulation (EU) 2019/2072

In the documentary check the emphasis is on the position (**92 a** or **92 b**, **109 a** or **109 b** or **109 c** or **109 d**)

In case more than one declaration should be present, they can be listed as:

Consignment complies with Annex VII, point **85**, and point **109 a** of Commission Implementing Regulation (EU) 2019/2072

7. The full text of the content of the declaration is mentioned in the column tables 'Required minimal additional declaration full text(see in bold) as it should appear on the certificate)'
8. Emergency measure (for a product or a group of products
For products mentioned above an emergency measure, temporary measure, derogation (e.g. dispensation from an import ban), or other, has been put in place by the EU. In some of these regulations an additional declaration is needed, next to the general obligations. In these cases the additional declaration can be put either with reference to the position only (the same as in the general regulation) or in full writing. In the tables for each product the options are mentioned. In case of full writing, the inspector, upon import, may demand a translation from the importer, due to control considerations. Certificate may be drawn up in any of the official languages of the EU. However, an inspector can not be expected to master all these languages. Therefore the inspector can request a translation from the importer, either on specific elements (e.g. the AD) or on the certificate as a whole.
9. [TABLES](#) with information provided by non-EU-countries on phytosanitary import requirements
10. The scientific names of products and organisms mentioned on the certificate should be written conform the official notation.
11. Besides the official English notation (EU) 2019/2072, the following notations are also accepted:
2019/.../CE
2019/.../EU
12. All treatments must be communicated by letter to the EU and mentioned with treatment data on the certificate
13. Text in [SMALL CAPS](#) and underlined: this is a link to a specified table in the document; use Ctrl+click
14. **Yellow marked text:** in this version added or changed
15. **Yellow and double-striked-out text:** in this version striked out, in next version deleted
16. CN code ex- (ex means from): all CN codes that begin with these digits are included
for example: ex 4407 all CN codes that begin with 4407 Wood sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or end-jointed, of a thickness exceeding 6 mm: Coniferous, Tropical wood, Other.

Definition of wood

According to EU 2016/2031, Article 2.2

'Plant products' means unmanufactured material of plant origin and those manufactured products that, by their nature or that of their processing, may create a risk of the spread of quarantine pests.

Wood shall only be considered as a plant product if it fulfils one or more of the following criteria:

- (a) it retains all or part of its natural round surface, with or without bark;
- (b) it has not retained its natural round surface due to sawing, cutting or cleaving;
- (c) it is in the form of chips, particles, sawdust, wood waste, shavings or scrap;
- (d) it is, or is intended to be, used as packaging material, whether or not it is actually in use for transport of goods;

The following product forms are not included in the definition of wood

- Charcoal
- Pellet, briquettes, plywood or particle board. If it has undergone processing involving the use of glue, heat or pressure or a combination thereof;
- Bamboo (*Gramineae*)

Wood product forms

[WOOD \(EXCEPT WOOD PACKAGING MATERIALS, WOOD IN THE FORM OF CHIPS, PARTICLES, SAWDUST, SHAVINGS, WOOD WASTE AND ISOLATED BARK\)](#)

[WOOD IN THE FORM OF CHIPS, PARTICLES, SAWDUST, SHAVINGS, WOOD WASTE AND SCRAP OBTAINED IN WHOLE OR PART](#)

[WOOD ISOLATED BARK](#)

Reclaimed lumber and barn-wood from Canada

Import of reclaimed coniferous lumber. Most of the wood is old, rough, milled and bark free timber that has been stored at mills. Wood has been sitting for many years (20+ years). Some of the wood has been reclaimed from old barns, but the age of the wood cannot be determined. The intended use is for decorative construction. the wood is extremely dry (< 10% moisture content).

Reclaimed lumber is exempted from the EU regulation for Heat Treatment.

Import to the Netherlands is possible on the following conditions:

Official statement (by the Canadian NPPO) on the Phytosanitary Certificate:

- The wood has been inspected by the Canadian NPPO
- The wood is old (+20 years) and dry (<10% moisture content) and it doesn't form a phytosanitary risk
- Quantity and species (*Pseudotsuga*, *Pinus*, *Thuja* etc.)

Definition of Wood packaging materials

Packing cases, boxes, crates, drums and similar packings, pallets, box pallets and other load boards, pallet collars, dunnage ('stuwhout'), whether or not actually in use in the transport of objects of all kinds, except dunnage supporting consignments of wood, which is constructed from wood of the same type and quality as the wood in the consignments and which meets the same Union phytosanitary requirements as the wood in the consignment, but including that which has not kept its natural round surface.

Specific import conditions for the introduction into the Union territory of wood packaging material

Wood packaging material, whether or not actually in use in the transport of objects of all kinds, shall only be introduced into the Union territory if it fulfils all of the following requirements:

- (a) It has been subject to one or more of the approved treatments and complies with the applicable requirements set out in Annex 1 to the International Standard for Phytosanitary Measures No 15 Regulation of Wood Packaging Material in International Trade (ISPM15);
- (b) It is marked with the IPPC mark referred to in Annex 2 of ISPM15 attesting that it has been subject to the treatments referred to in point (a)

For wood packaging material and dunnage, no certificate is required upon import; the IPPC mark on the wood is proof that the wood has been correctly debarked, treated and marked in accordance with the global standard ISPM 15. This also applies to the import of packaging wood, for example new pallets with markings to be imported, stacked on an old, already used pallet with mark. When the new pallets to be imported are provided with a mark, FC is no longer necessary.

Specific requirements for Marking of wood packaging material, wood, or other objects is mentioned in Article 71.2 of the Plant Health Regulation (EU)2016/2031. ISPM 15 also sets out rules for the authorisation and supervision of professional operators in the Union territory applying that mark. In the Netherlands this is regulated by [SMHV](#).

The following articles are of sufficiently low risk to be exempted from the provisions of ISPM15:

- Wood packaging material made entirely from thin wood (6 mm or less in thickness);
- Wood packaging made wholly of processed wood material, such as plywood, particle board, oriented strand board or veneer that has been created using glue, heat or pressure, or a combination thereof;
- Barrels for wine and spirit that have been heated during manufacture;
- Gift boxes for wine, cigars and other commodities made from wood that has been processed and/or manufactured in a way that renders it free of pests;
- Sawdust, wood shavings and wood wool;
- Wood components permanently attached to freight vehicles and containers;

Each of the pieces is less than 3 cm in width or, if they are larger than 3 cm in width, has a surface of less than 50 cm² • sawing • heat treatment, i.e. the wood is heated through its profile to at least 71°C for 1200 minutes in a heat chamber approved by the national plant protection organization in the third country or an agency approved by that organization; • drying, i.e. the wood is dried following industrial drying schedules of at least two-week duration, recognised by the national plant protection organization in the third country, and the final moisture content of the wood does not exceed 10% expressed as a percentage of dry matter
--	--	---

and

(ii) The wood has been produced, handled or stored in a facility which fulfils all of the following requirements:

- the facility is officially approved by the national plant protection organization in the third country or by an agency approved by that organisation, pursuant to its certification programme concerning *Agilus planipennis*
- the facility is registered in a database published on the website of the national plant protection organization in the third country
- the facility is audited by the national plant protection organisation in the third country or an agency approved by that organisation, at least once per month and it has been concluded that it complies with the requirements of this Annex point. In case the audits have been performed by an agency other than the national plant protection organization in the third country, that organisation has carried out audits of this work at least every six months. Those audits have included the verification of the procedures and documentation of the agency, and audits at approved facilities
- it uses equipment for the treatment of wood which has been calibrated consistently with the equipment's manual of operation
- it keeps record of its procedures for verification by the national plant protection organization in that country or an agency approved by that organisation, including the duration of treatment, temperatures during treatment and for each specific bundle to be exported, the compliance check and final moisture content

and

(iii) Each bundle of the wood visibly displays both a number and a label with the words 'HT-KD' or 'Heat Treated - Kiln Dried'. That label has been issued by, or under the supervision of, a designated officer of the approved facility after verifying that the processing requirements set out in point (i) and the requirements for facilities set out in point (ii) have been complied with

		<p>and</p> <p>The wood destined for the Union has been inspected by the national plant protection organisation in that country, or an agency officially approved by that authority, to ensure that the requirements laid down in points (i) and (iii) of this point are met. The bundle number(s) corresponding to each specific bundle being exported and the name of the approved facility(ies) in the country of origin shall be mentioned on the phytosanitary certificate referred to under the rubric 'Additional declaration'</p>

Each of the pieces is less than 3 cm in width or, if they are larger than 3 cm in width, has a surface of less than 50 cm²

- sawing
- heat treatment, i.e. the wood is heated through its profile to at least 71°C for 1200 minutes in a heat chamber approved by the national plant protection organization in the third country or an agency approved by that organization;
- drying, i.e. the wood is dried following industrial drying schedules of at least two-week duration, recognised by the national plant protection organization in the third country, and the final moisture content of the wood does not exceed 10% expressed as a percentage of dry matter

and

(v) The wood has been produced, handled or stored in a facility which fulfils all of the following requirements:

- the facility is officially approved by the national plant protection organization in the third country or by an agency approved by that organisation, pursuant to its certification programme concerning *Agrilus planipennis*
- the facility is registered in a database published on the website of the national plant protection organization in the third country
- the facility is audited by the national plant protection organisation in the third country or an agency approved by that organisation, at least once per month and it has been concluded that it complies with the requirements of this Annex point. In case the audits have been performed by an agency other than the national plant protection organization in the third country, that organisation has carried out audits of this work at least every six months. Those audits have included the verification of the procedures and documentation of the agency, and audits at approved facilities
- it uses equipment for the treatment of wood which has been calibrated consistently with the equipment's manual of operation

		<ul style="list-style-type: none"> it keeps record of its procedures for verification by the national plant protection organization in that country or an agency approved by that organisation, including the duration of treatment, temperatures during treatment and for each specific bundle to be exported, the compliance check and final moisture content <p>and</p> <p>(vi) Each bundle of the wood visibly displays both a number and a label with the words 'HT-KD' or 'Heat Treated – Kiln Dried'. That label has been issued by, or under the supervision of, a designated officer of the approved facility after verifying that the processing requirements set out in point (i) and the requirements for facilities set out in point (ii) have been complied with</p> <p>and</p> <p>The wood destined for the Union has been inspected by the national plant protection organisation in that country, or an agency officially approved by that authority, to ensure that the requirements laid down in points (i) and (iii) of this point are met. Each of the pieces is less than 3 cm in width or, if they are larger than 3 cm in width, has a surface of less than 50 cm² • sawing • heat treatment, i.e. the wood is heated through its profile to at least 71°C for 1200 minutes in a heat chamber approved by the national plant protection organization in the third country or an agency approved by that organization; • drying, i.e. the wood is dried following industrial drying schedules of at least two-week duration, recognised by the national plant protection organization in the third country, and the final moisture content of the wood does not exceed 10% expressed as a percentage of dry matter <p>and</p> <p>(viii) The wood has been produced, handled or stored in a facility which fulfils all of the following requirements:</p> <ul style="list-style-type: none"> • the facility is officially approved by the national plant protection organization in the third country or by an agency approved by that organisation, pursuant to its certification programme concerning <i>Agrilus planipennis</i> • the facility is registered in a database published on the website of the national plant protection organization in the third country
--	---	---

- the facility is audited by the national plant protection organisation in the third country or an agency approved by that organisation, at least once per month and it has been concluded that it complies with the requirements of this Annex point. In case the audits have been performed by an agency other than the national plant protection organization in the third country, that organisation has carried out audits of this work at least every six months. Those audits have included the verification of the procedures and documentation of the agency, and audits at approved facilities

- it uses equipment for the treatment of wood which has been calibrated consistently with the equipment's manual of operation

- it keeps record of its procedures for verification by the national plant protection organization in that country or an agency approved by that organisation, including the duration of treatment, temperatures during treatment and for each specific bundle to be exported, the compliance check and final moisture content

and

(ix) Each bundle of the wood visibly displays both a number and a label with the words 'HT-KD' or 'Heat Treated - Kiln Dried'. That label has been issued by, or under the supervision of, a designated officer of the approved facility after verifying that the processing requirements set out in point (i) and the requirements for facilities set out in point (ii) have been complied with

and

The wood destined for the Union has been inspected by the national plant protection organisation in that country, or an agency officially approved by that authority, to ensure that the requirements laid down in points (i) and (iii) of this point are met. The bundle number(s) corresponding to each specific bundle being exported and the name of the approved facility(ies) in the country of origin shall be mentioned on the phytosanitary certificate referred to under the rubric 'Additional declaration'

WOOD, including wood which has not kept its natural round surface

Quercus (Except *Quercus agrifolia*, *Quercus calliprinos*, *Quercus chrysolepis*, *Quercus engelmannii*, *Quercus ithaburensis*, *Quercus lobata*, *Quercus palustris*, *Quercus robur* and *Quercus suber*)

Commission implementing regulation (EU) 2023/1312

Oak wood: *Quercus spp*

Origin: United States of America.

Product form: Oak logs with bark for the production of veneer

Derogation from Regulation (EU) 2019/2072 By way of derogation from the requirements set out under 'Special requirements' in point 90 of Annex VII to Implementing Regulation (EU) 2019/2072, the specified wood may be introduced into the Union territory if the requirements laid down in Articles 4 and 5 of this Regulation, and the Annex thereto have been fulfilled.

Origin	Required additional declaration full reference text, as it should appear on the certificate	Required minimal additional declaration text (see in bold) as it should appear on the certificate

Each of the pieces is less than 3 cm in width or, if they are larger than 3 cm in width, has a surface of less than 50 cm² • sawing • heat treatment, i.e. the wood is heated through its profile to at least 71°C for 1200 minutes in a heat chamber approved by the national plant protection organization in the third country or an agency approved by that organization; • drying, i.e. the wood is dried following industrial drying schedules of at least two-week duration, recognised by the national plant protection organization in the third country, and the final moisture content of the wood does not exceed 10% expressed as a percentage of dry matter <p>and</p>
--	--	---

(xiv) The wood has been produced, handled or stored in a facility which fulfils all of the following requirements:

- the facility is officially approved by the national plant protection organization in the third country or by an agency approved by that organisation, pursuant to its certification programme concerning *Agilus planipennis*
- the facility is registered in a database published on the website of the national plant protection organization in the third country
- the facility is audited by the national plant protection organisation in the third country or an agency approved by that organisation, at least once per month and it has been concluded that it complies with the requirements of this Annex point. In case the audits have been performed by an agency other than the national plant protection organization in the third country, that organisation has carried out audits of this work at least every six months. Those audits have included the verification of the procedures and documentation of the agency, and audits at approved facilities
- it uses equipment for the treatment of wood which has been calibrated consistently with the equipment's manual of operation
- it keeps record of its procedures for verification by the national plant protection organization in that country or an agency approved by that organisation, including the duration of treatment, temperatures during treatment and for each specific bundle to be exported, the compliance check and final moisture content

and

(xv) Each bundle of the wood visibly displays both a number and a label with the words 'HT-KD' or 'Heat Treated - Kiln Dried'. That label has been issued by, or under the supervision of, a designated officer of the approved facility after verifying that the processing requirements set out in point (i) and the requirements for facilities set out in point (ii) have been complied with

		<p>and</p> <p>The wood destined for the Union has been inspected by the national plant protection organisation in that country, or an agency officially approved by that authority, to ensure that the requirements laid down in points (i) and (iii) of this point are met. The bundle number(s) corresponding to each specific bundle being exported and the name of the approved facility(ies) in the country of origin shall be mentioned on the phytosanitary certificate referred to under the rubric 'Additional declaration'</p>
